

Barry Chat

Bluetooth chat application

Product Description

Barry Chat

Barry Chat is a bluetooth chat application for boys (Barry's) and girls (Barbara's). You can chat with everybody that's around you for free. You set your profile to Barry or Barbara, and off you go!!

This is a killer app for in the classroom, meetings, and on the work floor. People used to hand small notes to each other; now they will use Barry Chat. Apart from the ability to annoy anybody around you, it can also be used for getting a date.

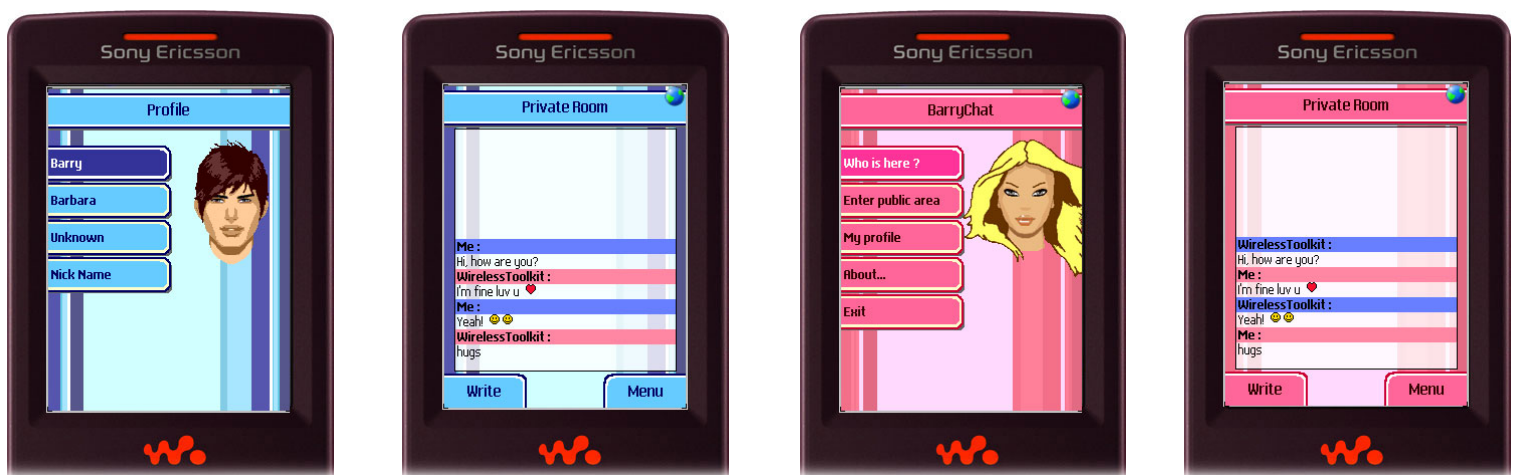

Multiple Chats

You can have multiple conversations with people around you. All Barries and Barbaras are automatically added to the public room, so you can have a "class conversation".

You can use smilies and pre-defined sentences. If somebody doesn't have Barry Chat, you can still send him a message, and invite him to join.

Barry or Barbara

You can set your profile to "Barry" or "Barbara" which will change the look of the application and how people will detect you. So if you are in a club looking for a date, you will see who is a Barry and who is a Barbara.
